Subject: Re: funding for Illinois EPA at Sauget 

Mike - I thought IEPA first needed to ensure that RCRA would make the resources available? I thought you had told me that you had heard from Clarence that they would but that he was going to call me with what their need would be. I feel that we should be able to find some level of supportbut I need for IEPA to propose a funding amount before I can assess whether we can find the funding. I can tell you however that I am thinking in the 10s of thousands not the 100s of thousand range.

Wendy: I just received a message from my counterpart at IEPA - her boss (Terry Ayers) would like to know about the funding for availability for oversight on the RCRA issues at Sauget. Have you had any time to check on this?
